

## “Ig Adem Kit For Total Ig Purification”

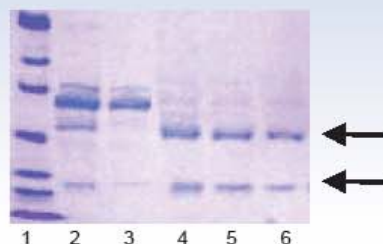

### Ig Purification Procedure

- **Total immunoglobulin purification:** IgG, IgM, IgA
- **High Binding capacity:** for large scale purification  
>15 mg of human IgG/ml of magnetic particles
- **Broad specificity:**
  - wide range of sample: serum, ascites or cell supernatant
  - from various species
- **Easy to use:**  
Ig Adem kit contains all necessary components (ready to use purification buffers and prepacked beads)
- **A simple and fast method:**  
hands on time less than 30 minutes

### SDS Page analysis showing purification of total Ig from human serum

Lane 1: Molecular weight markers,  
Lane 2: Human serum before capture,  
Lane 3: Flow through,  
Lane 4: First Elution,  
Lane 5: Second Elution,  
Lane 6: Third Elution,  
The arrows indicate the location of the light and heavy Ig chains.

### Ordering information

Product	Size	Code number
Ig Adem kit	15 total Ig purifications	04400
Ig Adem kit	30 total Ig purifications	04401

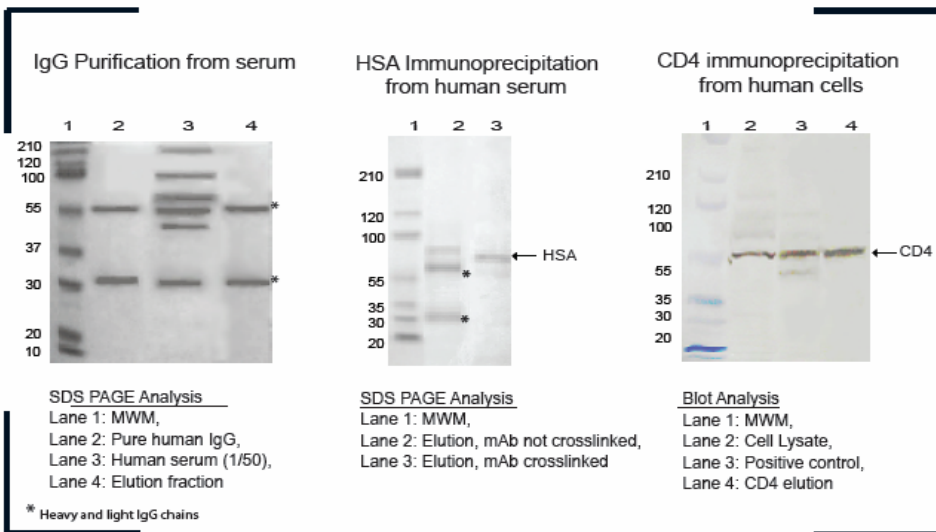

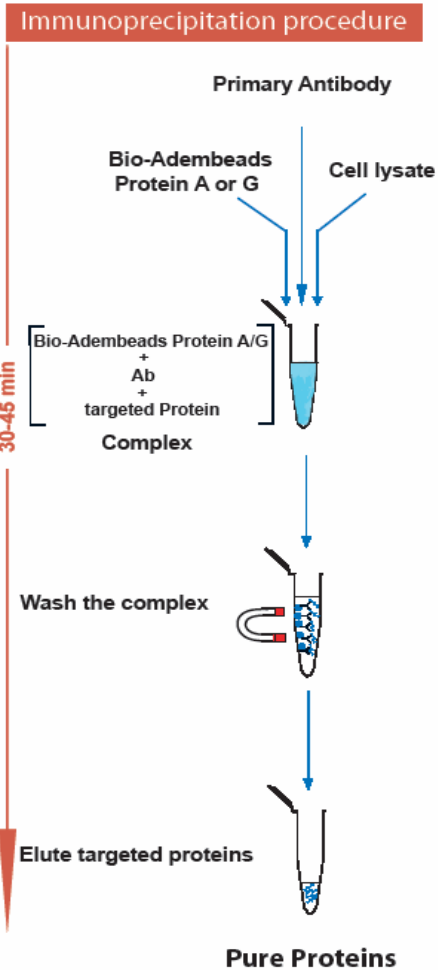

# Bio-Adembeads Protein A and G: Immunoprecipitation and IgG Purification

Unlimited applications with your own antibodies

- **Magnetic technology:** high specificity - no background
- **Rapid procedure:** less than 1h
- **No IgG elution:** IgG crosslinking procedure
- **High capacity:** up to 100 tests for 2ml
- **Simple:**
  - no centrifugation
  - washing step are reduced
  - no preclearing step required

## Ordering Information

	Product	Size	Code Number
NEW	Bio-Adembeads Protein A	100 Immunoprecipitations	04230
	Bio-Adembeads Protein A	250 Immunoprecipitations	04231
NEW	Bio-Adembeads Protein G	100 Immunoprecipitations	04330
	Bio-Adembeads Protein G	250 Immunoprecipitations	04331
